TMGT WisdomTree Tech Megatrends UCITS ETF - USD Acc

Investment Objective

The WisdomTree Tech Megatrends UCITS ETF (the "Fund") seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Tech Megatrends Equity UCITS Index (the "Index"). The Index is designed to tap into the long-term growth potential of disruptive tech companies around the world and benefit from the structural technological changes shaping the world's future.

Index Description

The Index is designed to track the performance of global listed companies involved in investment themes across the Technological Shifts megatrend, which include but are not limited to artificial intelligence, blockchain, cloud computing, cybersecurity or quantum computing. The Index is built around 4 main steps:

The Strategic Thematic Asset Allocation

The Index invests in a curated portfolio of investment themes to focus on the most promising themes at any point in time and maximise diversification between themes.

The Tactical Thematic Asset Allocation

Themes are driven by various factors over time, from regulatory changes, macroeconomic background, to technological advances and evolving consumer preferences. This can produce both tailwinds and headwinds in a theme's development. The Index uses momentum signals to overweight and underweight themes to adapt to current market environments.

The Thematic Stock Selection

The Index uses multiple thematic experts to build a systematic framework to identify the most relevant, pure-play companies for each theme.

Final Momentum Stock selection

The number of holdings is reduced by focusing on the stocks with the highest momentum in each theme. The relative weight of each theme remains unchanged. To be included in the Index, companies must meet WisdomTree's ESG (environmental, social and governance) criteria outlined in the Index methodology and other criteria such as minimum market capitalisation and liquidity.
