

WBLD WisdomTree Europe Infrastructure UCITS ETF - EUR Acc

Investment Objective

The WisdomTree Europe Infrastructure UCITS ETF (the "Fund") seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Europe Infrastructure UCITS Index (the "Index"). The Index is designed to capture the performance of companies enabling Europe's next infrastructure wave. The Fund aims to give investors access to what could be one of the largest multi-decade capex cycles in Europe.

Index Description

The Index is designed to measure the performance of global companies involved in the European infrastructure sector, including but not limited to, companies engaged in the construction and development of transportation infrastructure, digital infrastructure, renewable energy infrastructure, power transmission and distribution, and other activities that support or enable Europe's infrastructure development.

The selection of companies within the Index is based on their revenue exposure to Europe and involvement in either (a) activities directly involved in Europe's infrastructure build-out, including both project developers and constructors and specialised component or equipment suppliers ("Core Infrastructure Activities"); or (b) activities that provide adjacent, supportive, or enabling products and services which may be utilised in infrastructure projects but are not exclusively infrastructure driven ("Adjacent Infrastructure Activities").

Each eligible company is assigned a relevancy score of 3, 2 or 1, reflecting high, medium, or low relevancy of involvement in European infrastructure development activities, based on both revenue contribution and geographic exposure (the "Relevancy Score").

The Index is weighted by market capitalization adjusted by the Relevancy Score and subject to certain caps and criteria outlined in the Index methodology. The combined weight of medium and low relevancy score companies is limited to 50%, and the total weight of non-EU-domiciled companies is capped at 20% to maintain a strong European profile.

The Index was developed by WisdomTree, Inc. ("WT"). Companies must conduct their primary business activities in one of the developed countries outlined in the Index methodology. The Index excludes companies that do not meet WisdomTree's ESG (environmental, social, and governance) criteria and applies minimum liquidity requirements.

The Index is rebalanced on a semi-annual basis.

Potential Benefits

- Gain pure-play access to the Europe's next Infrastructure wave through a diversified basket of construction firms and specialist suppliers positioned to benefit from sustained public and private capex, rather than broad industrial exposure.
- Capture policy-backed momentum, with binding European and national targets compelling the rapid build-out of infrastructure across transport, clean energy, digital infrastructure and grid modernisation.
- The research for the selection and weighting of companies in the Index is conducted by WisdomTree with significant expertise in constructing thematic indices, ensuring the portfolio basket remains focused and relevant.
- The ETF is physically backed, UCITS compliant, liquid, and easily accessible via the largest UK and European exchanges.

Potential Risks

- Although the Index was designed to capture companies globally with high exposure to the Europe Infrastructure theme, there is no guarantee this objective will be achieved.
- An investment in equities may experience high volatility and should be considered as a longer-term investment.
- Infrastructure spending, permitting and procurement are influenced by government priorities and regulation. Changes to policy support, fiscal rules or approval timelines may affect project pipelines and returns.
- Investment risk may be concentrated in specific sectors, countries, companies or currencies.
- This list does not cover all risks - further risks are disclosed in the relevant KID/KIID document and Prospectus.

Glossary

Dividend Weighted Index: an index that determines the weight of its constituents using the dividends paid by the security rather than another variable (the most common is Market Cap weighted indices).

Fully Replicated: assets are invested in securities that match the constituents of the relevant index, in the same proportion.

Fundamentally Weighted Index: an index that weights securities on the basis of factors such as dividends or earnings.

Large Cap, Mid Cap and Small Cap: refers to market capitalisation and is calculated by multiplying the price of a stock by the number of shares outstanding.

Listing currency: the trading currency on the exchange.

Physical (Optimised): assets are predominantly invested in securities that are constituents of the index, but may also hold securities whose characteristics closely resemble the characteristics of the index.

Physically Backed: securities held by the fund are the actual securities not a derivative.

Rebalance: An index is created by applying a certain set of selection and weighting rules of countries, sectors and stocks at a certain frequency. A Rebalance is when WisdomTree re-applies its rules based selection and weighting process.

Rebalance Frequency: The frequency by which the constituents of the index are screened and their weights changed.

Replication Method: the method by which the fund gets exposure to the benchmark index.

Share class currency or the "NAV currency": The currency that the fund's NAV is issued in.

Total Expense Ratio (TER): A measure of the total costs associated with managing and operating a fund. The TER consists primarily of management fees plus other expenses such as trustee, custody and operating expenses. It does not cover the swap fee. The TER is expressed as a percentage of the fund's total net asset value.
