

# WTVU WisdomTree US Value UCITS ETF - USD Acc

## Investment Objective

The WisdomTree US Value UCITS ETF (the "Fund") seeks to track the price and yield performance, before fees and expenses, of the WisdomTree US Value UCITS Index (the "Index"). This Index is designed to capture US companies that exhibit strong value characteristics while maintaining robust quality standards.

## Index Description

The index is rules-based and fundamentally weighted, comprising mid- and large-cap US companies that exhibit strong value characteristics and favourable quality attributes. It excludes companies that do not meet WisdomTree's ESG (environmental, social, and governance) criteria and applies minimum liquidity requirements.

From the eligible universe, companies are ranked by total shareholder yield, which combines dividend yield and net buyback yield over the trailing twelve months. The top 30% of the ranked companies are selected, provided they meet additional risk-screening requirements.

This risk screening uses a composite risk score that equally weights quality factors (Return on Equity, Return on Assets, Gross Profits over Assets and Cash Flows over Assets) and momentum factors, to remove companies with weaker fundamentals or negative price trends.

Constituents are weighted according to their total shareholder yield, ensuring that companies delivering higher shareholder returns receive larger weights. Sector weights are capped to limit deviations from the market-weighted eligible universe, maintaining diversification while preserving the focus on yield and quality.

## Glossary

**Dividend Weighted Index:** an index that determines the weight of its constituents using the dividends paid by the security rather than another variable (the most common is Market Cap weighted indices).

**Fully Replicated:** assets are invested in securities that match the constituents of the relevant index, in the same proportion.

**Fundamentally Weighted Index:** an index that weights securities on the basis of factors such as dividends or earnings.

**Large Cap, Mid Cap and Small Cap:** refers to market capitalisation and is calculated by multiplying the price of a stock by the number of shares outstanding.

**Listing currency:** the trading currency on the exchange.

**Physical (Optimised):** assets are predominantly invested in securities that are constituents of the index, but may also hold securities whose characteristics closely resemble the characteristics of the index.

**Physically Backed:** securities held by the fund are the actual securities not a derivative.

**Rebalance:** An index is created by applying a certain set of selection and weighting rules of countries, sectors and stocks at a certain frequency. A Rebalance is when WisdomTree re-applies its rules based selection and weighting process.

**Rebalance Frequency:** The frequency by which the constituents of the index are screened and their weights changed.

**Replication Method:** the method by which the fund gets exposure to the benchmark index.

**Share class currency or the "NAV currency":** The currency that the fund's NAV is issued in.

**Total Expense Ratio (TER):** A measure of the total costs associated with managing and operating a fund. The TER consists primarily of management fees plus other expenses such as trustee, custody and operating expenses. It does not cover the swap fee. The TER is expressed as a percentage of the fund's total net asset value.
