

WCAR WisdomTree Global Automotive Innovators UCITS ETF - USD Acc

Investment Objective

The WisdomTree Global Automotive Innovators UCITS ETF (the "Fund") seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Berylls LeanVal Global Automotive Innovators NTR Index (the "Index").

Index Description

The Index is designed to measure the performance of publicly traded companies primarily involved in the global automotive industry. Companies need to derive at least 50% revenue from the automotive industry. Selected companies must also meet WisdomTree's ESG (environmental, social and governance) criteria and other criteria such as minimum market capitalisation and liquidity.

The Index utilises a focus score which quantifies and measures a company's overall involvement across themes in the automotive industry. The Index also utilises a fundamental score which is an aggregation of five equally-weighted fundamental factor scores (value, quality, stability, growth and momentum). The top 100 companies are selected for Index inclusion based on their combined focus score and fundamental score. The Index is weighted by float-adjusted market capitalisation and is rebalanced on a semi-annual basis in March and September.
