WNER WisdomTree New Economy Real Estate UCITS ETF - USD

Investment Objective

The WisdomTree New Economy Real Estate UCITS ETF (the "Fund") seeks to track the price and yield performance, before fees and expenses, of the WisdomTree New Economy Real Estate UCITS Index (the "Index"). The Index is designed to track the performance of global companies from developed markets involved in the real estate infrastructure that underpins many megatrends such as AI, Digitalisation or HealthTech. It delivers exposure to technology-driven growth, focusing on alternative real estate sectors poised for expansion.

Index Description

The Index is designed to measure the performance of companies from global developed markets and have exposure to new economy real estate such as technology, science and/or e-commerce-related business activities.
To be eligible for inclusion in the Index, companies from global developed markets need to engage in new economy real estate activities. Such activities are categorised as:
"Digital and Industrial Economy Infrastructure" – Covering sectors including, but not limited to, telecommunication towers, data centres, modern logistics and e-commerce facilities, and other industrial and specialized infrastructures.
"Next-Generation Digital Infrastructure" – Encompassing companies including but not limited to those that are blockchain-enabled or that provide high-performance computing (HPC) facilities and other advanced digital infrastructure.
Selected companies must also meet WisdomTree's ESG (environmental, social and governance) criteria, as well as other criteria such as minimum market capitalisation and liquidity as outlined in the Index methodology.
A minimum of 50 stocks that meet the Index's activity exposure and selection criteria are included. The Index maintains a target allocation of 90% to Digital and Industrial Economy Infrastructure and 10% to Next-Generation Digital Infrastructure. Within each category, companies are weighted by market capitalisation and subject to capping rules that cap a single stock's weight at 7.5% and floor it at 0.05%, along with volume factor adjustments and other criteria outlined in the Index methodology.
The Index is rebalanced on a semi-annual basis in March and September.
Before April 10, 2025, the benchmark for the WisdomTree New Economy Real Estate UCITS ETF was the CenterSquare New Economy Real Estate UCITS Index. Index performance data reflects this index for all periods before that date and the WisdomTree New Economy Real Estate UCITS Index from April 10, 2025, onward.

Potential Benefits

Real Estate is integral to the evolution of technologies which underpin many megatrends.

The fund delivers thematic exposure to the infrastructure powering the new economy, granting investors access to an alternative approach to megatrends and offering an exciting opportunity at the intersection of technology-driven megatrends and real estate.

The ETF provides exposure to the Digital and Industrial Economy Infrastructure, which includes telecommunication towers, data centres, healthcare and life sciences facilities, modern logistics, e-commerce, and other specialised industrial infrastructure.

It also provides exposure to Next-Generation Digital Infrastructure like blockchain-enabled platforms, digital infrastructure for cryptocurrency mining, and high-performance computing (HPC) facilities.

The ETF is physically backed and UCITS compliant.

Potential Risks

Although the Index was created to select companies with a relatively higher exposure to real estate companies, there is no guarantee this objective will be achieved.

An investment in equities may experience high volatility and should be considered as a longer-term investment.

Higher growth companies such as those that play a part in megatrends tend to trade at higher valuations. The investor should consider the risk that comes with higher valuations as part of any investment decision.

Investment risk may be concentrated in specific sectors, countries, companies or currencies.

This list does not cover all risks - further risks are disclosed in the relevant key information document and Prospectus.

Glossary

Dividend Weighted Index: an index that determines the weight of its constituents using the dividends paid by the security rather than another variable (the most common is Market Cap weighted indices).

Fully Replicated: assets are invested in securities that match the constituents of the relevant index, in the same proportion.

Fundamentally Weighted Index: an index that weights securities on the basis of factors such as dividends or earnings.

Large Cap, Mid Cap and Small Cap: refers to market capitalisation and is calculated by multiplying the price of a stock by the number of shares outstanding.

Listing currency: the trading currency on the exchange.

Physical (Optimised): assets are predominantly invested in securities that are constituents of the index, but may also hold securities whose characteristics closely resemble the characteristics of the index.

Physically Backed: securities held by the fund are the actual securities not a derivative.

Rebalance: An index is created by applying a certain set of selection and weighting rules of countries, sectors and stocks at a certain frequency. A Rebalance is when WisdomTree re-applies its rules based selection and weighting process.

Rebalance Frequency: The frequency by which the constituents of the index are screened and their weights changed.

Replication Method: the method by which the fund gets exposure to the benchmark index.

Share class currency or the "NAV currency": The currency that the fund's NAV is issued in.

Total Expense Ratio (TER): A measure of the total costs associated with managing and operating a fund. The TER consists primarily of management fees plus other expenses such as trustee, custody and operating expenses. It does not cover the swap fee. The TER is expressed as a percentage of the fund's total net asset value.
