

# QGRW WisdomTree US Quality Growth UCITS ETF - USD Acc

## Investment Objective

The WisdomTree US Quality Growth UCITS ETF (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree US Quality Growth UCITS Index (the “Index”). The index aims to deliver an exposure to high quality, growing companies from the US markets which meet WisdomTree’s ESG (environmental, social and governance) criteria.

## Index Description

The Index is rule based and is comprised of 100 US companies with quality and growth characteristics. The index excludes companies which do not meet WisdomTree’s ESG (environmental, social and governance) criteria. The index selects the top 100 companies in the eligible universe based on the combination of growth and quality characteristics. The component companies are then weighted in the index by free-float market capitalization, and the Index is rebalanced semi-annually.

## Glossary

**Dividend Weighted Index:** an index that determines the weight of its constituents using the dividends paid by the security rather than another variable (the most common is Market Cap weighted indices).

**Fully Replicated:** assets are invested in securities that match the constituents of the relevant index, in the same proportion.

**Fundamentally Weighted Index:** an index that weights securities on the basis of factors such as dividends or earnings.

**Large Cap, Mid Cap and Small Cap:** refers to market capitalisation and is calculated by multiplying the price of a stock by the number of shares outstanding.

**Listing currency:** the trading currency on the exchange.

**Physical (Optimised):** assets are predominantly invested in securities that are constituents of the index, but may also hold securities whose characteristics closely resemble the characteristics of the index.

**Physically Backed:** securities held by the fund are the actual securities not a derivative.

**Rebalance:** An index is created by applying a certain set of selection and weighting rules of countries, sectors and stocks at a certain frequency. A Rebalance is when WisdomTree re-applies its rules based selection and weighting process.

**Rebalance Frequency:** The frequency by which the constituents of the index are screened and their weights changed.

**Replication Method:** the method by which the fund gets exposure to the benchmark index.

**Share class currency or the "NAV currency":** The currency that the fund's NAV is issued in.

**Total Expense Ratio (TER):** A measure of the total costs associated with managing and operating a fund. The TER consists primarily of management fees plus other expenses such as trustee, custody and operating expenses. It does not cover the swap fee. The TER is expressed as a percentage of the fund's total net asset value.
