WisdomTree S&P 500 3x Daily Short

Investment Objective

WisdomTree S&P 500 3x Daily Short is a fully collateralised, UCITS eligible Exchange Traded Product (ETP) designed to provide investors with a leveraged short exposure to the S&P 500. The ETP provides a total return comprised of -3 times the daily performance of the S&P 500 Total Return Index (SPXT), adjusted to reflect fees as well as the costs and revenues inherent to shorting stocks. For example, if the S&P 500 Total Return Index rises by 1% over a day, then the ETP will fall by 3%, excluding fees. However if the S&P 500 Total Return Index falls by 1% over a day, then the ETP will rise by 3%, excluding fees.

Index Description

The S&P 500 Index is a capitalization-weighted index of 500 stocks. The index is designed to measure performance of the broad US economy through changes in the aggregate market value of 500 stocks representing all major industries. The S&P 500 index components and their weightings are determined by S&P Dow Jones Indices. The S&P 500 Total Return Index is a gross total return version of the index.

Risk Management: You cannot lose more than the amount invested.

Liquidity: Trades on exchange, with multiple authorised participants (APs) and market makers (MMs).

Potential Risks

An investment in an ETP involves a degree of risk. Any decision to invest should be based on the information contained in the relevant prospectus. Prospective investors should obtain independent accounting, tax and legal advice and should consult their professional advisers to ascertain the suitability of this ETP as an investment to their own circumstances.

This ETP is structured as a debt security and not as shares (equity) and can be created and redeemed on demand by authorised participants and traded on exchange just like shares in a company. This ETP is not a UCITS product.

Investing in Short and Leveraged ETPs is only suitable for sophisticated and or informed investors who understand leverage, daily rebalancing and compounded daily returns and are willing to magnify potential losses. Short and Leveraged ETPs are only intended for investors who understand the risks involved in investing in an ETP with short or leveraged exposure and who intend to invest on a short term basis. Any investment in a short or leveraged ETP should be monitored on a daily basis to ensure consistency with your investment strategy. You should understand that investments in daily leveraged ETPs held for a period of longer than the recommended holding period of one day, may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor over the same period. Daily compounding may result in returns which an investor may not expect, if the investor has not fully understood how a daily leveraged ETP works. Potential losses in leveraged ETPs may be magnified in comparison to investments that do not incorporate leverage. In extreme volatility, returns of leveraged ETPs, even over one day, may under-perform the return of the underlying unleveraged index multiplied by the ETP's leverage factor because of protection mechanisms within the ETP structure, intended to protect against intra-day market crashes. For more information see here: <https://www.wisdomtree.eu/en-gb/resource-library/short-and-leveraged-centre>

Market Risk: The value of securities in this ETP is directly affected by increases and decreases in the value of the Index. Accordingly, the value of a security may go up or down and a security holder may lose some or all of the amount invested but can not lose more than the amount invested.

Liquidity risk: There can be no certainty that securities can always be bought or sold on a stock exchange or that the market price at which the securities may be traded on a stock exchange will always accurately reflect the performance of the Index.

Currency Risk: The price of securities in this ETP is generally quoted in USD. To the extent that a security holder purchases securities in another currency, the value will be affected by changes in the exchange rate.

Counterparty risk: The Issuer is reliant on there being swap counterparties available to enter into swap agreements on a continuing basis and, if no swap counterparties are willing to do so, the ETP will not be able to achieve its investment policy of tracking the performance of the Index.

Credit Risk: The Issuer is subject to the risk that third party service providers may fail to return property or collateral belonging to the Issuer or pay money due to the issuer. The ETP is backed by swaps. The payment obligations of the swap counterparties to the Issuer are protected by collateral held which is marked to market daily. The collateral is held in segregated accounts at The Bank of New York Mellon. In the event a swap counterparty defaults, the proceeds from realisation of the collateral may be less than what the investor expects. Details of the collateral held can be found in the Collateral section of the WisdomTree website (www.wisdomtree.com).

Please see the risks factors section of the Prospectus for a more detailed discussion of the potential risks

Glossary

Authorised participant: Banks or other financial institutions that act as intermediaries between issuers of securities and other investors or intermediaries. Authorised participants subscribe for and redeem securities directly with the Issuer and buy and sell those securities to investors intermediaries either directly or via stock exchanges.

Collateral held: Cash or other transferable securities which are held independently to reduce the Issuer's credit risk in respect of any single counterparty. For example, if the Index (tracked by the ETP) increases, the amount owed to the Issuer by the swap counterparty increases and therefore additional collateral is transferred by the swap counterparty to reduce the increased risk to the ETP of that counterparty.

Exposure: An ETC has exposure to an index or commodity if its value is directly affected by movements in the price of that index commodity. Exposure to an index or commodity can be achieved in various different ways. This ETC aims to provide exposure to the Index using swaps.

Market Makers: Banks or other financial institutions that act as intermediaries between buyers and sellers of securities. They buy and sell securities to investors intermediaries either directly or via stock exchanges.

Swap counterparty: Typically a large bank or financial institution with whom the Issuer enters into swaps

WisdomTree Multi Asset Issuer PLC (the "Issuer") issues products under a Prospectus ("WTMA Prospectus") approved by the Central Bank of Ireland, drawn up in accordance with the Directive 2003/71/EC. The WTMA Prospectus has been passported to various European jurisdictions including the UK, Italy and Germany and is available on this document.

WisdomTree Multi Asset Issuer PLC Exchange Traded Products ("ETPs") are suitable for financially sophisticated investors who wish to take a view on the underlying indices and can understand the risks of investing in products offering leveraged or short exposures.

ETPs offering daily leveraged or daily short exposures ("Leveraged ETPs") are products which feature specific risks that prospective investors should understand before investing in them. Higher volatility of the underlying indices and holding periods longer than a day may have an adverse impact on the performance of Leveraged ETPs. As such, Leveraged ETPs are intended for financially sophisticated investors who wish to take a short-term view on the underlying indices and understand such risks. As a consequence, WisdomTree is not promoting or marketing WisdomTree Multi Asset Issuer PLC ETPs to retail clients. Investors should refer to the section entitled "Risk Factors" and "Economic Overview of the ETP Securities" in the WTMA Prospectus for further details of these and other risks associated with an investment in Leveraged ETPs and consult their financial advisors as needed. Neither WisdomTree, nor the Issuer has assessed the suitability of any Leveraged ETPs for investors other than the relevant Authorised Participants.

While many leveraged WisdomTree Multi Asset Issuer PLC ETPs reset the leverage or short exposure on a daily basis, certain WisdomTree Multi Asset Issuer PLC ETPs utilise leverage in longer term strategies, where leveraged exposures may be reset monthly. These products are also only suitable for financially sophisticated investors who have understood the specific risks within the prospectus of the relevant product.
