## 1. WISDOMTREE TECH MEGATRENDS UCITS ETF

<b>Fund:</b> WisdomTree Tech Megatrends UCITS ETF
<b>Index:</b> WisdomTree Tech Megatrends Equity UCITS Index (the “Index”)

### 1.1 Investment Objective

The WisdomTree Tech Megatrends UCITS ETF (the “**Fund**”) seeks to track the price and yield performance, before fees and expenses, of the Index.

### 1.2 Investment Policy

In order to achieve this objective, the Fund will employ a “passive management” (or indexing) investment approach and will invest in a portfolio of equity securities that so far as possible and practicable consists of a representative sample of the component securities of the Index.

The use of a representative sampling strategy means that, while the Fund will seek to invest all, or substantially all, of its assets in securities that are constituents of the Index, it may invest in a sample of Index constituents whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole. Therefore, while the Fund may from time to time invest in all constituents of the Index, it is not expected that at all times it will hold every constituent (or a similar weighting of any such constituent) of the Index.

Where consistent with its investment policy, the Fund may from time to time invest in equity or equity-related securities listed or traded on a Regulated Market (such as large, medium or small cap equities, common or preferred stocks and Depositary Receipts), other transferable securities (for example, medium term notes) and open-ended collective investment schemes. The collective investment schemes may be UCITS or AIFs, open-ended and established in Ireland, other member states of the EEA, the United States, Guernsey, Jersey or the Isle of Man, provided the requirements of the Central Bank are met. The Fund will invest at least 90% of its assets in equities or equity-equivalent securities. Subject to the provisions of the Regulations and the conditions imposed by the Central Bank, the Fund may invest in other sub-funds of the ICAV.

The Fund may enter into repurchase/reverse repurchase agreements and securities lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the Prospectus. A list of techniques and instruments which may be used by the Fund for efficient portfolio management purposes is set out in Appendix II of the Prospectus. The maximum proportion of the assets under management (“**AUM**”) of the Fund that can be subject to repurchase/reverse repurchase agreements and securities lending arrangements is 50%. The expected proportion of the AUM of the Fund that will be subject to repurchase/reverse repurchase agreements and securities lending arrangements is 0%.

The Investment Manager conducts credit assessments of counterparties to a repurchase/reverse repurchase agreement or securities lending arrangement. Where a counterparty is subject to a credit rating by an agency registered and supervised by the ESMA that rating shall be taken into account in the credit assessment process and where the counterparty is downgraded by the credit rating agency to A-2 or below (or comparable rating), a new credit assessment of the counterparty is conducted by the Investment Manager without delay. Another criterion used when selecting counterparties includes country of origin. For example, the counterparty may be a body corporate located in an EEA member state.

The Fund may hold ancillary liquid assets from time to time, for example, as dividends are collected. In such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes, transferable securities (for example, medium term notes) and money market instruments (such as short dated government backed securities, floating rate notes, commercial paper, certificates of deposit, treasury bills and treasury notes, each of which, where relevant, will be of investment grade at the time of acquisition). The Fund may not invest more than 10% of its net assets in aggregate in collective investment schemes.

Where the Fund invests in instruments described above which are not constituents of the Index, it will do so where it is consistent with its investment objective and policy and where the risk, return and other

characteristics of such securities resemble the risk, return and other characteristics of the Index as a whole and where the Investment Manager believes investment in such securities will aid the objective of tracking the return of the Index.

### 1.3 Sustainability Factors

For the purposes of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector (**SFDR**) the Fund is not deemed (i) a fund that promotes environmental or social characteristics; (ii) a fund that has sustainable investment as its objective; or (iii) a fund with reduction in carbon emissions as its objective. As such, the Fund discloses under Article 6 of the SFDR and does not disclose under Articles 8 or 9 of the SFDR.

The Fund is an index-tracking equity sub-fund that invests in the equity securities of global listed companies involved in investment themes across the technological shifts megatrend. The Manager has carried out an assessment of sustainability risks and their likely impact on the returns of the Fund as part of the Index selection process. While sustainability risks are relevant to the Fund's investment strategy through the exclusion criteria applied by the Index, the passive nature of the strategy limits the scope for active management of such risks. Therefore, while the Index may apply certain exclusion criteria, the Fund does not integrate sustainability risks into its investment process.

Due to the inherent uncertainty and forward-looking nature of sustainability risks (including climate-related, environmental, social, and governance risks), the precise quantification of their likely impact on returns remains challenging, particularly for passively managed strategies. Nonetheless, the Manager assesses the impact the sustainability risks may have on the returns of the Fund in light of the exclusions applied at the index level, which will depend on the specific exposures of the index constituents to such risks. In general, where a sustainability risk occurs in respect of an asset, there could be a negative impact on, or entire loss of, its value and therefore on the returns of the Fund.

Further details on sustainability risks and their potential impact on the returns of the Fund are set out in the section "Sustainability Risk" under "Risk Factors" below and in the section of the Prospectus entitled "Sustainability Factors".

### 1.4 EU Taxonomy

The investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

### 1.5 Share classes

The Fund may have different classes of Shares as set out in Section 5. Share classes may be designated in the Base Currency or in currencies other than the Base Currency (the "**Share Class Currency**"). Furthermore, the Fund may also offer hedged share classes ("**Hedged Share Classes**") which will hedge the Share classes' exposure to the underlying portfolio currencies (the "**Portfolio Currency**" or "**Portfolio Currencies**") to a currency designated at the Hedged Share Class level (the "**Exposure Currency**"). Although the Exposure Currency and Share Class Currency of some Share classes of the Fund are the same, the Exposure Currency of any new Share class established in the future may differ from its Share Class Currency. The Share Class Currency for each Share class and Exposure Currency for each Hedged Share Class are disclosed in Section 5 below under the heading "Available Share Classes".

#### Hedged Share Classes

Hedged Share Classes will seek to mitigate or hedge the exposure of each of the Portfolio Currencies to the relevant Exposure Currency through the use of forward exchange contracts (a contract between the Fund and a counterparty to buy or to sell a specific currency in the future at a certain exchange rate) or unfunded foreign-exchange ("**FX**") swaps (in this context, a swap would be a contract between the Fund and a swap counterparty, under which the latter provides the required currency exposure(s) to the Fund in exchange for a fee).

The Hedged Share Class' foreign currency exposures ("**Hedge Positions**") are re-set at the end of each month. The Hedge Positions of the Hedged Share Class are proportionately adjusted for net subscription and redemptions during the month and may be adjusted during the month to account for price movements of the Fund's Investments, corporate events affecting such Investments, or additions, deletions or any other

changes to the Index constituents (and thereby to the Fund's portfolio of Investments) to ensure compliance with the Prospectus. The Hedge Positions may also be adjusted during the month to avoid breaching the counterparty exposure limit.

Intra month, the notional amount of the Hedge Positions may not exactly offset the foreign currency exposure of a Hedged Share Class. Depending on whether the Index has appreciated or depreciated between each monthly Hedge Positions re-set, a Hedged Share Class' foreign currency exposure may be under-hedged or over-hedged respectively.

Any gains resulting from a Hedged Share Class' Hedge Positions shall be reinvested when the Hedge Positions are being re-set. In the event that the Hedge Positions provide exposure to the relevant Exposure Currency which is greater than the corresponding exposure to the Portfolio Currency prior to the month-end reset, the Hedged Share Class will have an exposure to the Exposure Currency in excess of the value of the corresponding Portfolio Currency-denominated investments. Conversely, in the event that the Hedge Position provides exposure to the relevant Exposure Currency which is less than the corresponding exposure to the Portfolio Currency prior to the month-end re-set, the Hedged Share class will have an exposure to the relevant Exposure Currency which is less than the value of its corresponding Portfolio Currency-denominated Investments. Any exposure difference will be re-set when the Hedge Positions are re- set. All hedging transactions will be clearly attributable to the specific Hedged Share Class and currency exposures of different classes will not be combined or offset.

## **1.6 Risk Management Process**

In accordance with the requirements of the Central Bank, the Investment Manager, employs a risk management process to enable it to accurately calculate, monitor, measure and manage, the various risks associated with the use of Financial Derivative Instruments (“**FDI**”) by the Fund. The Investment Manager uses the “Commitment Approach” to measure the Fund's incremental exposure and leverage generated through the use of FDI. The Commitment Approach seeks to manage and measure the global exposure and potential loss due to the use of FDI by the Fund. Where FDI are used for currency hedging purposes the exposure of the FDI is calculated and then netted against the assets being hedged.

## **1.7 Leverage and Global Exposure**

The Fund's global exposure will be calculated using the commitment approach. It is not the Investment Manager's intention to leverage the Fund. However, the Fund may be leveraged from time to time due to the use of FDI as part of the Fund's currency hedging. The Fund may therefore not be leveraged more than 100% of its Net Asset Value. That is, the total exposure associated with the Investments of the Fund, including investments in FDI, may amount to 200% of the Net Asset Value of the Fund.

# **2. WISDOMTREE TECH MEGATRENDS EQUITY UCITS INDEX**

## **2.1 Index description**

The Index is designed to measure the performance of global listed companies involved in investment themes across the technological shifts megatrend.

The technological shifts megatrend focuses on different themes that originate from the introduction of new technologies and innovation. It encompasses both disruptive and emerging technologies as well as their transformative impact on societies and economies, such as the increasing digitalisation and connectivity of the world (the “**Technological Shifts Megatrend**”).

The Technological Shifts Megatrend is represented by sub-investment themes, which include but are not limited to artificial intelligence, blockchain, cloud computing, cybersecurity and quantum computing. The list of sub-investment themes covered by the Index is detailed in the methodology of the Index.

The Index was developed by WisdomTree, Inc. (“**WTI**”) and is overseen by the WisdomTree Megatrends Index Committee (the “**Committee**”), a standing index committee of WTI. The Committee is responsible for making broad decisions with respect to the implementation, ongoing management, operation and administration of the Index and the weight allocated to the selected sub-investment themes based on

quantitative and qualitative criteria. Further details of the Committee can be found in the methodology of the Index.

The constituents of the Index are selected and weighted according to the construction process outlined below.

### ***Index Universe***

The Index applies a qualitative and quantitative based assessment to classify the sub-investment themes representing a Technological Shifts Megatrend. The Index applies the Conviction Rating, as defined below, to classify the sub-investment themes into “High”, “Medium” and “Low” conviction categories. The “High” and “Medium” sub-investment themes based on the Conviction Rating are eligible for inclusion. All eligible sub-investment themes are then categorised into different groups (the “**Return Clusters**”) based on a hierarchical clustering algorithm (the “**Return Cluster Algorithm**”). The Return Cluster Algorithm groups the sub-investment themes into Return Clusters based on the similarity of their excess returns. Further information in relation to this assessment is described in the methodology of the Index.

The Index selects representative themes for the Technological Shifts Megatrend based on themes’ Conviction Rating and uniqueness of the Return Cluster(s) as further described in the methodology for the Index.

To be eligible for inclusion in the Index, a security must meet the following criteria:

- have economic activities that align with at least one of the sub-investment themes representing the Technological Shifts Megatrend, as described above;
- be listed on an eligible stock exchange;
- meet minimum market capitalisation and liquidity criteria as detailed in the Index methodology; and
- other criteria as outlined in the methodology of the Index.

The Index also excludes companies based on environmental, social and governance (“**ESG**”) criteria. The ESG criteria seeks to exclude from the eligible investment universe companies that

- (i) violate, certain commonly accepted international norms and standards, such as United Nations and OECD guidelines,
- (ii) are involved in certain controversial weapons such as anti-personnel mines, cluster munitions, chemical and biological weapons, depleted uranium weapons and white phosphorus weapons and those that support nuclear weapons programmes to states outside the Treaty on the Non-Proliferation of Nuclear Weapons (commonly known as the Non-Proliferation Treaty or “**NPT**”),
- (iii) are significantly involved in the tobacco industry,
- (iv) are significantly involved in thermal coal activity, such as coal mining and exploration and coal-based power generation,
- (v) are significantly involved in unconventional oil and gas exploration/production, such as oil sands, Arctic oil and gas or shale energy, and
- (vi) do not meet such other ESG criteria such as significant involvement in small arms, as detailed in the Index methodology.

### ***Weighting Allocation***

The Index constituents are weighted in accordance with the Index methodology and follow a top-down weighting approach: the Technological Shifts Megatrend is weighted based on an overall conviction rating process by WTI (the “**Conviction Rating**”). The Conviction Rating is based on various quantitative and qualitative elements and research as outlined in the Index methodology. Each sub-investment theme within the Technological Shifts Megatrend is weighted as the average of an equal weight and the inverse of its 12-month volatility. This weight is further adjusted using a “momentum score” which is based on the short-term and long-term moving average return of each sub-investment theme. Each security is weighted within its sub-investment theme according to the basket weighting methodology as described in the Index methodology. Please refer to the Index methodology for further information.

The Index is rebalanced on a quarterly basis in January, April, July and October.

Full details on the Index are available at the following links:

<https://www.wisdomtree.com/investments/index/wttmtu>

<https://www.wisdomtree.eu/en-gb/-/media/eu-media-files/documents/1604/wisdomtree-index-methodology-217.pdf>

## 2.2 Index Calculation Agent

In order to minimise any potential for conflicts caused by the fact that WisdomTree, Inc (**WTI**) and its affiliates act as Index Provider and promoter of the ICAV, WTI has retained an unaffiliated third party to calculate the Index (the "**Calculation Agent**"). The Calculation Agent, using the applicable rules-based methodology, will calculate, maintain and disseminate the Index on a daily basis. WTI will monitor the results produced by the Calculation Agent to help ensure that the Index is being calculated in accordance with the applicable rules-based methodology. In addition, WTI has established policies and procedures designed to prevent non-public information about pending changes to the Index from being used or disseminated in an improper manner.

## 2.3 Portfolio Transparency

Information about the Investments of the Fund is made available on a daily basis. The Fund may disclose on [www.wisdomtree.eu](http://www.wisdomtree.eu) at the start of each Business Day the identities and quantities of the securities and other assets held by it. The portfolio holdings so disclosed will be based on information as of the close of business on the prior Business Day and/or trades that have been completed prior to the opening of business on that Business Day and that are expected to settle on that Business Day.

## 2.4 Anticipated Tracking Error

The Investment Manager aims to keep Tracking Error below or equal to 2 % for each Share class. There is, however, no guarantee that this level of Tracking Error will be realised and neither the ICAV, the Manager nor the Investment Manager will be liable for any discrepancies between the Fund's anticipated level of Tracking Error and the actual level of Tracking Error (as subsequently observed). The annual report of the ICAV will provide an explanation of any divergence between anticipated and realised Tracking Error for the relevant period. The annual and half-yearly reports will state the Fund's Tracking Error at the end of the period under review.

## 3. RISK FACTORS

**An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.** Investors should consider the risk factors set out in the Prospectus together with the following risks:

**Concentration Risk.** A Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds. In addition, a Fund may concentrate its investments in companies in a particular industry, market or economic sector. When a Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector. Further, investors may buy or sell substantial amounts of a Fund's shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and thereby, its performance.

**Country Risk.** The value of the Fund's assets may be subject to uncertainties such as changes in a country's government policies, taxation, restrictions on foreign investment, currency decisions, applicable

laws and regulations, or any natural disasters or political upheaval, which may weaken a country's securities markets.

**Currency Risk.** Where the Index constituents are denominated in currencies other than the Base Currency or the Share Class Currency, Investments of the Fund will be acquired in currencies which are not in the Fund's Base Currency or the Share Class Currency. The Fund will therefore be subject to exchange rate risk and the cost of acquiring Investments may be adversely or favourably affected by fluctuations in the exchange rate of the different currencies.

If an investor's currency of reference is different from the Fund's Base Currency or the Share Class Currency, adverse movements in exchange rates between those currencies can result in a decrease in return and a loss of capital for such investor.

Hedging techniques in the form of currency forwards or swaps will be used to mitigate the exposure of a Currency Hedged Class to the Portfolio Currencies.

**Equity Risk.** The market prices of equity securities owned by the Fund may go up or down, sometimes rapidly or unpredictably. The value of a security may decline for a number of reasons that may directly relate to the issuer (investors should also refer to "Issuer-Specific Risk"). The values of equity securities also may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. The Fund may continue to accept new subscriptions and to make additional investments in equity securities even under general market conditions that the Investment Manager views as unfavourable for equity securities. Equity securities generally fall into four broad categories – large-cap, mid-cap, small-cap and micro-cap. If the Fund invests primarily in one category, there is a risk that due to current market conditions, the Fund may perform less well than a fund that is invested in another category or across several categories.

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. For example, political and economic conditions and changes in regulatory, tax, or economic policy in a country could significantly affect the market in that country and in surrounding or related countries and have a negative impact on the Fund's performance. As per the Fund's investment objective, the Fund may invest all of its assets in companies organised in the United States.

**ESG Risk.** The Fund seeks to track the performance of the Index which excludes securities based on ESG criteria. Investors should therefore make a personal ethical assessment of the extent of ESG exclusion undertaken by the Index prior to investing in the Fund.

Due to the ESG exclusion being applied to the investment universe to determine eligibility for inclusion in the Index, the Index will comprise a narrower universe of securities. This narrower universe of securities will not necessarily perform as well as those securities that do not meet the ESG criteria and this may adversely affect the performance of the Fund. Furthermore, investor sentiment towards companies which are perceived as being ESG conscious or attitudes towards ESG concepts generally may change over time which may affect the demand for ESG based investments such as the Fund and may also affect its performance.

**ESG Data Risk.** ESG information received from third-party data providers may be incomplete, inaccurate, or unavailable. As a result, there is a risk that the Index Provider or other data providers (as applicable) may incorrectly assess the ESG rating of or the involvement of a company in certain activities, resulting in the incorrect inclusion or exclusion of a security in/from the Index and therefore the portfolio of the Fund.

**Sustainability Risk.** Sustainability risks are relevant as both standalone risks as well as crosscutting risks, which manifest through many other risk types, which are relevant to the assets of the Fund. For example, the occurrence of a sustainability risk can give rise to financial and business risk causing a negative impact on the share price of a company. The increasing importance given to sustainability considerations by both companies and consumers means that the occurrence of a sustainability risk may result in significant reputational damage to affected companies. These events might cause a material negative impact on the value of a Fund's investments. Whilst the Index applies ESG exclusion criteria, as set out above, with the aim of mitigating the impact of sustainability risks, there can be no assurance that all sustainability risks can be mitigated in the Fund.

**Hedging Methodology Risk.** While the hedging methodology used by the Hedged Share Classes is designed to minimise the impact of currency fluctuations on Hedged Share Class returns, it does not necessarily eliminate the Hedged Share Classes' exposure to the Portfolio Currency. The return of the forward currency contracts may not perfectly offset the actual fluctuations between the Portfolio Currency and the Exposure Currency.

**Investment Risk.** There is no assurance that any appreciation in the value of Investments will occur, or that the investment objective of the Fund will be achieved.

**Issuer-Specific Risk.** Changes in the financial condition of an issuer or counterparty, changes in the specific economic or political conditions that affect a particular type of security or issuer, and changes in the general economic or political conditions can affect a security's or instrument's value. The value of securities of smaller, less well-known issuers can be more volatile than that of larger issuers. Issuer-specific events can have a negative impact on the value of the Fund.

**Market Risk.** The trading price of equity securities, fixed income securities, commodities and other instruments fluctuates in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Net Asset Value of the Fund, like security and commodity prices generally, will fluctuate within a wide range in response to these and other factors. Possible continuing market turbulence may have an adverse effect on the Fund's performance. As a result, an investor could lose the value of its investment over short or even long periods.

**Mid and Large Capitalisation Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid and large capitalisation companies. The securities of mid-capitalisation companies may be subject to more unpredictable price changes than securities of larger companies or the market as a whole. The securities of large-capitalisation companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion.

**Portfolio Turnover Risk.** Portfolio turnover generally involves a number of direct and indirect costs and expenses to the relevant Fund, including, for example, brokerage commissions, dealer mark-ups and bid/offer spreads, and transaction costs on the sale of instruments and reinvestment in other instruments. Nonetheless, a Fund may engage in frequent trading of investments in furtherance of its investment objective.

**Small-Cap Risk.** Small-sized companies may be more volatile and more likely than large- and mid-capitalisation companies to have relatively limited product lines, markets or financial resources, or depend on a few key employees. Returns on investments in stocks of small companies could trail the returns on investments in stocks of larger companies. The shares of newly established companies may be less liquid than the shares of more mature and established companies. Newly established companies, as compared with more mature and established companies, may have a shorter history of operations, may not have as great an ability to raise additional capital and may have a smaller public market for their shares.

**Sectorial Investment Risk.** To the extent the Fund invests a significant portion of its assets in the securities of companies engaged across a number of technology growth sectors, it is more likely to be impacted by events or conditions affecting that sector. The Fund may invest a relatively large percentage of its assets in sectors, including but not limited to, the artificial intelligence, blockchain, cloud computing, cybersecurity and quantum computing industries, which sectors have tended to form a relatively large percentage of the Index.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the Shares of the Fund will approximate the Fund's Net Asset Value, there may be times when the market price and the Net Asset Value vary significantly, including due to supply and demand of the Fund's Shares and/or during periods of market volatility. Thus, you may pay more (or less) than Net Asset Value intra-day when you buy Shares of the Fund in the secondary market, and you may receive more (or less) than Net Asset Value when you sell those Shares in the secondary market. If an investor purchases Fund Shares at a time when the market price is at a premium to the Net Asset Value of the Fund's Shares or sells at a time when the market price is at a discount to the Net Asset Value of the Fund's Shares, an investor may sustain losses.

**Thematic Investment Risk.** The Index Provider applies the selection methodology to data provided by third parties in order to create an index which reflects the targeted themes. If the securities are not selected properly or if the themes are not well-defined, the performance of the Index may be affected.

#### 4. SHARE DEALING

Orders for Creation Units may be settled in cash, in-kind or in a combination of both, at the Manager's discretion. Investors are referred to the procedures for subscribing and redeeming Creation Units in the section entitled "Share Dealing" of the Prospectus.

<b>Initial Offer Price</b>	During the Initial Offer Period, the Shares Classes will be issued at the Initial Offer Price described in the table in section 5 "Available Share Classes" below.
<b>Initial Offer Period</b>	The Initial Offer Period for the Share Classes will commence at 9.00am (Irish time) on 29 May 2026 and conclude upon the earlier of: 5.00pm (Irish time) on 25 November 2026 or such earlier or later time as the Directors may decide and notify the Central Bank.
<b>Base Currency</b>	US Dollars
<b>Business Day</b>	A day on which commercial banks are generally open for business in London.
<b>Creation Unit</b>	20,000 Shares, unless determined otherwise by the Manager.
<b>Dealing Day</b>	Each Business Day (provided that any day on which 30% or more of the markets on which constituents in the Index are listed or traded are closed, such Business Day shall not be a Dealing Day). A list of the Fund's Dealing Days is available from the Administrator.
<b>Dealing Deadline</b>	On each Business Day prior to the relevant Dealing Day, the time as set out in the table below.
<b>Publication Time</b>	8.00 a.m. (Irish time) on each Dealing Day.
<b>Valuation Point</b>	10.15 p.m. (Irish time) on each Dealing Day.
<b>Dividend Policy</b>	Dividends will normally be declared in March, June, September and December of each year.  Share classes with an accumulating policy shall not distribute dividends to Shareholders. Income and other profits will be accumulated and reinvested on behalf of Shareholders.
<b>Subscriptions following the Initial Offer Period</b>	Creation Units may be subscribed for on a Dealing Day at a price based on the Net Asset Value per Share multiplied by the number of Shares in a Creation Unit. Applicants for Shares must also remit the amount of cash and charges as set out in the Portfolio Composition File and pay Duties and Charges, if applicable.  The Manager, at its discretion, may charge a Subscription Fee of up to 3% of the aggregate Net Asset Value per Share in the Creation Unit subscribed for.

<b>Settlement of subscriptions</b>	<p>Settlement of subscriptions must be received by the Administrator:</p> <p>(a) in respect of cash subscriptions, by 2 p.m. (Irish time) on the first Business Day after the relevant Dealing Day; provided that if such day is not a day on which foreign exchange markets are open for settlement of payments in the Base Currency (a “<b>Currency Day</b>”), settlement will be postponed to the immediately following Currency Day;</p> <p>(b) in respect of in-kind subscriptions, by 3 p.m. (Irish time) on the first Business Day after the relevant Dealing Day or within such other period as the Directors may determine (not exceeding 10 Business Days following the relevant Dealing Deadline).</p>
<b>Redemptions</b>	<p>Creation Units may be redeemed on a Dealing Day at a price based on the Net Asset Value per Share multiplied by the number of Shares in a Creation Unit. A redeeming Shareholder will have deducted from redemption proceeds an appropriate amount of Duties and Charges, if applicable.</p> <p>Shares which are the subject of the redemption must be received by the Fund by 2 p.m. (Irish time) on the second Business Day after the relevant Dealing Day.</p> <p>The Manager, at its discretion, may charge a Redemption Fee of up to 3% of the aggregate Net Asset Value per Share in the Creation Unit redeemed.</p>
<b>Settlement of redemptions</b>	<p>Redemption proceeds will be typically transferred within two Business Days of the relevant Dealing Day and, in any event, within such other period as the Directors may determine (not exceeding 10 Business Days following the relevant Dealing Deadline), provided that all required documentation has been furnished to the Administrator and the relevant Shareholder has delivered, in the relevant Securities Settlement System, the Shares to be redeemed.</p>
<b>Valuation methodology</b>	<p>Investments of the Fund which are listed or traded on one Regulated Market for which quotations are readily available shall be valued at the last traded price on such Regulated Market for such Investment. Where Investments are quoted, listed or normally dealt in on more than one Regulated Market, the market which in the opinion of the Administrator, constitutes the main market for the relevant Investment or which provides the fairest criteria for valuing the relevant Investment shall be used. A particular or specific asset may be valued using an alternative method of valuation if the Directors deem it necessary and the alternative method has been approved by the Depositary.</p>
<b>Compulsory redemption threshold</b>	<p>US\$15 million.</p>

**5. AVAILABLE SHARE CLASSES**

Share Class Name	Index	ISIN	Share Class Currency	Exposure Currency	TER	Dividend Policy	Dealing Deadline for Cash (in Kind) Subscriptions /Redemptions, Irish time	Initial Offer Price (in Share Class Currency)

## **6. FEES**

The Fund shall pay the following fees and expenses out of its assets:

- A. a TER (as set out in the table above);
- B. brokerage or other expenses of acquiring and disposing of Investments, as set out in further detail in the Prospectus; and
- C. extraordinary expenses (i.e. those unforeseen expenses falling outside of the general expenses payable by the Manager out of its fees, such as expenses related to any litigation, exercise of voting rights and corporate actions).

Investors are referred to the section of the Prospectus entitled "Operational costs and expenses".

Fees and expenses relating to establishment of the Fund will be borne by the Manager.

## **7. MISCELLANEOUS**

### **Classification as an Equity Fund for German tax purposes**

The Fund will be managed in such a way to ensure that it qualifies as an "Equity Fund", as such term is defined in the German Investment Tax Act 2018 (as amended), please see section headed "German Taxation" within the Prospectus.

## **8. DISCLAIMERS**

### **Index**

Neither the ICAV, the Manager, the Investment Manager, WTI nor their affiliates guarantee the accuracy or the completeness of the Index or any data, including any ESG data received from third-parties included therein and shall have no liability for any errors, omissions or interruptions therein. Such parties make no warranty, express or implied, to the owners of Shares of the Fund or to any other person or entity, as to the results to be obtained by the Fund from the use of the Index or any data included therein. Without limiting any of the foregoing, in no event shall such parties have any liability for any special, punitive, direct, indirect or consequential damages (including lost profits), even if notified of the possibility of such damages.

### **Index Provider website**

The ICAV is required to provide details of WTI's website to enable Shareholders to obtain further details of the Index (including its constituents). Neither the ICAV, the Manager nor the Investment Manager has any responsibility for the contents of such website and are not involved in any way in sponsoring, endorsing or otherwise involved in the establishment, maintenance or contents of the website.
