

# WisdomTree Recycling UCITS ETF - USD Acc

## Sustainability-related disclosure

### Summary

#### Kein nachhaltiges Investitionsziel

Der Fonds bildet den Tortoise Recycling Decarbonization UCITS Index (der Index) nach. Der Index ist so gestaltet, dass er sicherstellt, dass die in den Index aufgenommenen nachhaltigen Investitionen keine erhebliche Beeinträchtigung verursachen, indem Ausschluss- und Auswahlkriterien für Umwelt, Soziales und Unternehmensführung (ESG) angewendet werden, die die Indikatoren für die wichtigsten nachteiligen Auswirkungen (PAI-Indikatoren) auf der Grundlage von Tabelle 1 in Anhang I der technischen Regulierungsstandards für die Verordnung 2019/2088 (SFDR-RTS) berücksichtigen. Wie in der Indexmethode beschrieben, bedient sich der Index normen- und wertbasierter Ausschlussverfahren.

#### Nachhaltiges Investitionsziel des Fonds

Das nachhaltige Investitionsziel des Fonds besteht darin, in Unternehmen anzulegen, die in den Bereichen Energiegewinnung aus Abfällen und Recycling tätig sind und somit zu den Umweltzielen des Klimaschutzes und der Kreislaufwirtschaft beitragen. Der Fonds erreicht dieses Ziel durch die Nachbildung des Index.

#### Anlagestrategie

Das Investitionsziel des Fonds ist die Nachbildung der Kurs- und Renditeentwicklung des Index vor Gebühren und Aufwendungen. Zur Erreichung dieses Ziels wendet der Fonds einen Ansatz des „passiven Managements“ an und investiert in eine repräsentative Auswahl von den im Index enthaltenen Wertpapieren. Der Index ist so konzipiert, dass er die Wertentwicklung von Unternehmen abbilden soll, die im Bereich der Recycling- und Abfallmanagement-Technologien als Teil des globalen Megatrends der Dekarbonisierung tätig sind. Der Index wurde als Referenzwert bestimmt, um das nachhaltige Investitionsziel des Fonds zu unterstützen.

#### Aufteilung der Investitionen

Der Fonds wird sein gesamtes, oder im Wesentlichen sein gesamtes Vermögen in die Komponenten des Index investieren, so dass mindestens 90 % des Nettoinventarwerts (NIW) des Fonds aus nachhaltigen Investitionen bestehen.

#### Überwachung des nachhaltigen Investitionsziels

WisdomTree überwacht die Erreichung des nachhaltigen Investitionsziels des Fonds zum Zeitpunkt jeder Indexneugewichtung.

## **Methoden**

Inwieweit der Fonds sein nachhaltige Investitionsziel erreicht, wird vom Fonds anhand von Daten des Indexanbieters und gegebenenfalls von externen Datenanbietern gemessen.

## **Datenquellen und -verarbeitung**

Der Fonds ist ein passiv verwalteter indexnachbildender Fonds, der sein nachhaltiges Investitionsziel durch die Nachbildung des Index erreicht. WisdomTree verarbeitet die von externen Datenanbietern zur Verfügung gestellten Daten, um Emittenten auf der Grundlage der ESG-Ausschlusskriterien zu überprüfen und so das infrage kommende Anlageuniversum festzulegen.

## **Grenzen der Methoden und Daten**

Um das erklärte Investitionsziel zu erreichen und die Anlagepolitik des Fonds zu erfüllen, stützt sich WisdomTree auf ESG-Daten von externen Anbietern, die unvollständig, ungenau oder nicht verfügbar sein können. Zudem besteht ein Risiko, dass der Indexanbieter oder andere Datenanbieter (soweit zutreffend) das ESG-Rating oder die Beteiligung eines Unternehmens an bestimmten Tätigkeiten falsch einschätzen.

## **Sorgfaltspflicht**

WisdomTree führt vor der Auflegung des Fonds eine Sorgfaltsprüfung in Bezug auf den Indexanbieter und den Referenzindex durch. Damit soll festgestellt werden, ob der Fonds das gewünschte Anlageergebnis und sein nachhaltiges Investitionsziel erreichen kann.

## **Mitwirkungspolitik**

WisdomTree übt über seine Anlageverwalter, an die das Portfoliomanagement ausgelagert ist, Stimmrechte aus und arbeitet konstruktiv mit den Unternehmen, in die investiert wird, zusammen. Bei der Auswahl und Überwachung der Anlageverwalter stellt WisdomTree sicher, dass deren Abstimmungs- und Mitwirkungspolitik den von WisdomTree festgelegten Standards entspricht.

## **Erreichung des nachhaltigen Investitionsziels.**

Der Index wurde als Referenzwert bestimmt, um das nachhaltige Investitionsziel des Fonds zu erreichen. Informationen über den Index finden Sie [hier](#).

## **No significant harm to the sustainable investment objective**

The Fund tracks the Tortoise Recycling Decarbonization UCITS Index. The Index is designed to ensure that sustainable investments included in the Index do not cause significant harm to other environmental or social objectives by implementing ESG exclusionary screening and selection criteria that takes account of PAI Indicators based on Table 1 of Annex I of the RTS. The Index applies norms and values-based exclusion screens as detailed in the Index methodology.

The ESG exclusionary criteria are aligned with certain mandatory PAI Indicators such as exposure to fossil fuels, controversial weapons, non-renewable energy consumption and production and violations of UN Global Compact Principles (UN GCPs) and OECD guidelines. Each PAI Indicator is individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI Indicator and underlying metric set out in SFDR RTS. PAI Indicator performance is assessed quarterly at the Fund level based on a tailored PAI dataset received from the Investment Manager and third-party data provider. An investee company's performance, either overall or on certain PAI Indicators may be assessed possibly leading to engagement with the issuer and tracking performance after the engagement based on relevant PAI-related KPI and / or exclusion from the investable universe.

In addition, the Index the Index applies a tiered screening approach which includes a review of companies' carbon emissions data reported in a company's most recent annual or quarterly report and/or sustainability report as assessed by the Index Provider and set out in the Index methodology.

The Index methodology includes robust governance criteria whereby companies are assessed based on the Global Standards Screening (GSS) assessment which identifies and excludes from the eligible investment universe companies that violate or are at risk of violating international norms and standards, such as UNGCPs, UN Guiding Principles on Business and Human Rights (UN GPs) and OECD Guidelines for Multinational Enterprises and their underlying conventions. Companies on the UN, US and EU sanctions list are excluded. In addition to the governance screening, to be eligible for inclusion in the Index, a company must be listed on an eligible stock exchange listed in the Index methodology and must comply with securities listing rules including relevant corporate governance codes.

Based on the DNSH assessment, the sustainable investments made by the Fund do not significantly harm any other environmental or social objective.

## **Sustainable investment objective of the financial product**

The Fund has a sustainable investment objective of investing in companies involved in waste-to-energy and recycling activities which contributes to environmental objectives of climate change mitigation and circular economy. Waste-to-energy activities include waste disposal processes used to generate energy from waste such as garbage, animal manure, products and/or animal fats. This process generates clean energy and has a positive effect on energy-related greenhouse gases. In addition, recycling activities include plastics recycling which helps prevent, amongst others, ocean plastic pollution.

The Fund achieves this objective by tracking the Index, which has a methodology that is aligned with attaining the sustainable investment objective of the Fund.

## Investment strategy

The investment objective of the Fund is to track the price and yield performance, before fees and expenses, of the Index. To achieve this objective, the Fund will employ a "passive management" (or indexing) investment approach and will invest in a representative sample of component securities of the Index which is designed to track the performance of companies primarily involved in waste-to-energy and recycling activities. The Index has been designated as a reference benchmark for the purpose of supporting the sustainable investment objective of the Fund.

The Index only includes companies from eligible Global Industry Classification Standard (GICS) sub-industries which derive at least 20% of revenue, or operating profit, or own assets, or 20% of the company's capital expenditure is in decarbonising waste management and recycling related businesses. The tiered screen applied by the Index reviews companies' involvement in the waste-to-energy and recycling activities and emissions data to evaluate emissions avoided as described in the Index methodology. The tiered weighting approach aims to overweight companies with higher exposure to waste-to energy and recycling activities and companies with zero or negative reported carbon emissions.

In addition, the Index applies ESG exclusionary criteria and seeks to exclude companies from the eligible investment universe that are significantly involved (as described in the Index methodology) in thermal coal, conventional and unconventional oil and gas exploration/production and in the tobacco industry and small arms sectors. Companies with any involvement in controversial weapons are also excluded from the eligible investment universe by the Index.

To be included in the Index, a security must be issued by a company operating a business related to waste-to- energy and recycling. The preliminary universe of companies is identified based on the following screens:

- Companies that derive revenue, operating profit, own assets or capital expenditures in decarbonizing waste-to-energy and recycling related businesses included in the Index provider's proprietary database of global energy companies.
- Waste-to-energy business activity includes production of renewable natural gas and renewable diesel. It also includes production of ethanol and other biomass like wood waste.
- Recycling business activity includes traditional recycling activities such as glass, paper and cardboard recycling as well as recycling plastics into original materials such as polypropylene for re-use. In addition, includes lithium-ion battery recycling as well as companies engaged in carbon capture and sequestration.

The Index methodology includes good governance criteria whereby companies are assessed based on the GSS assessment described above. The GSS assessment identifies and excludes companies from the eligible investment universe that violate or are at risk of violating certain commonly accepted international norms and standards, such as United Nations and OECD guidelines.

The Fund, through its Investment Manager, adopts an active ownership policy and believes in constructive engagement and exercising voting rights to promote stronger corporate governance and better management of ESG risks in investee companies.

## **Proportion of investments**

The Fund will invest all, or substantially all, of its assets in the constituents of the Index with the result that a minimum of 90% of the Fund's NAV will be aligned with the sustainable investment objective of the Fund.

Up to 10% of the Fund's assets may be invested in ancillary liquid assets in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, or invested in assets for which there is insufficient ESG-related data. This applies in particular to assets for which ESG factors are insufficiently defined at present or which are not covered by third-party data providers.

For more information, please see the Supplement for the Fund.

## **Monitoring of environmental or social characteristics**

The Fund achieves the sustainable investment objective outlined above by tracking the Index. WisdomTree monitors the attainment of the Fund's sustainable investment objective at the time of each Index rebalance. This is carried out by evaluating whether the Index is correctly applying the stated ESG exclusionary and GSS assessment criteria outlined in detail above as well as determining the proportion of the Fund's investments active in waste-to-energy and recycling business activities in line with the Index methodology. This includes an evaluation by WisdomTree of ESG data, including sustainable investment data which is provided by third-party data providers. As described more fully in the Index methodology, sustainable investment indicators used comprise of a company's revenue, operating profit, assets or capital expenditure used to measure the perceived degree of involvement in waste to energy and recycling activities and is derived from each company's most recent annual report or quarterly report, and/or sustainability report (as assessed by the Index Provider).

WisdomTree also monitors the tracking error of the Fund and reports this to investors as part of the publication of annual and interim financial statements of the ICAV. Information on the anticipated tracking error is also published in the Supplement for the Fund.

## **Methodologies**

The extent to which the sustainable investment objective of the Fund is attained is measured using data provided by the Index Provider and third-party data providers, where relevant.

The Index methodology is assessed by the Fund as being aligned with its sustainable investment objective of investing in companies being involved in waste to energy and recycling business activities. This assessment is carried out by the Fund at the time of each Index rebalance and is based on quantitative measures to evaluate the waste to energy and recycling categories described in the Index methodology. The relevant thresholds for evaluating the waste to energy and recycling categories are described in the Index methodology.

The Index excludes companies based on ESG exclusionary and GSS assessment criteria described above and in the Index methodology. The ESG exclusionary criteria are applied based on companies' revenue levels at the time of each Index rebalance using data provided by third-party data providers.

## **Data sources and processing**

The Fund is a passively managed index tracking fund and attains its sustainable investment objective by tracking the Index.

WisdomTree processes data provided by its ESG Data Provider to screen issuers based on the ESG exclusionary criteria as set out in the Index Methodology in order to establish the eligible investment universe.

Monitoring of the Index Provider and third-party data providers is carried out annually as part of WisdomTree's enhanced oversight and due diligence processes. This due diligence includes evaluating the methodologies adopted by our ESG Data Provider to assess issuers, the sources of information that they use and the quality of ESG data they provide. ESG Data coverage provided by third-party data providers is also assessed at the time of each Index rebalance.

WisdomTree uses data sources from other third-parties for comparison purposes to identify any potential data inconsistencies. There may be issuers for which insufficient ESG-related data is available due to a lack of coverage by third-party data providers.

Data estimates may be used by third-party data providers particularly for smaller companies or where there are gaps in company reported data or where a company does not report actual revenues for certain business involvement categories.

## **Limitations to methodologies and data**

To meet the stated investment objective and policy of the Fund, WisdomTree relies on ESG data provided by third-party data providers and may be incomplete, inaccurate, or unavailable. As a result, there is a risk that the Index Provider or other data providers (as applicable) may incorrectly assess the ESG rating or the involvement of a company in certain activities as part of the ESG exclusionary criteria applied by the Index Provider. This may result in the incorrect inclusion or exclusion of a security from the Index and therefore the portfolio of the Fund.

Please refer to the section above "Data Sources and Processing" and "Due Diligence" regarding internal controls to monitor constituent data.

In placing reliance on external data providers, there may be inherent risk associated with errors in third-party data which may not be detected by WisdomTree or the Index Provider. The result being that companies may from part of the investment universe that are inconsistent with the stated methodology of the Index and/or the stated investment objective/policy of the Fund. WisdomTree seeks to mitigate this risk by obtaining ESG data from reputable sources, using a second independent data source and investigating data differences to our primary ESG data provider.

Where an index constituent is identified as not meeting the stated sustainable investment objective of the Fund, it will be removed from the Index at the next scheduled rebalance (or periodic review). The Index may cease to meet the stated ESG criteria between index rebalances until the Index is rebalanced back in line with the Index methodology, at which point the Fund will also be rebalanced in line with the Index.

ESG Data Providers may have different business interests that could give rise to conflicts of interest when assigning ESG ratings or assessing the involvement of a company in certain activities.

## Due diligence

WisdomTree carries out due diligence on the Index Provider and reference Index prior to the launch of the Fund.

As part of this due diligence, WisdomTree assesses the Index methodology to determine whether it would achieve the desired investment outcome and the sustainable investment objective of the Fund. This evaluation includes the investment universe of the Index, coverage by third-party ESG data providers, ESG exclusionary criteria and security weighting methodology.

The evaluation also ensures that the Fund's sustainable investment objective does no significant harm to other environmental or social objectives. In addition, WisdomTree monitors PAIs indicators on sustainability factors of investee companies at the Fund level on a quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the third-party ESG data provider.

## Engagement policies

As a responsible investor, WisdomTree adopts an active ownership approach to promote better corporate behaviour in investee companies in terms of sustainability and management of Environmental, Social and Governance risks.

WisdomTree exercises voting rights and constructively engages with investee companies through its investment managers, to whom portfolio management activities are outsourced. In selecting and monitoring investment managers, WisdomTree ensures that voting and engagement policies of the Investment Managers match the standards defined by WisdomTree.

Further details on WisdomTree's proxy voting policy are available at <https://www.wisdomtree.eu/en-gb/wisdomtree-investment-governance> and on WisdomTree voting dashboard available at: <https://www.wisdomtree.eu/en-ie/proxy-voting-dashboard>.

## Attainment of the Sustainable Investment Objective

The Index has been designated as a reference benchmark and is designed to track the performance of companies primarily involved in waste-to-energy and recycling. Waste-to-energy activities include waste disposal processes used to generate energy from waste such as garbage, animal manure, products and/or animal fats. This process generates clean energy and has a positive effect on energy-related greenhouse gases. In addition, recycling activities include plastics recycling which helps prevent, amongst others, ocean plastic pollution. The Fund has determined that tracking the Index will enable it to meet its sustainable investment objective.

Information on how that Index is aligned with the sustainable investment objective of the Fund, including the input data, the methodologies used to select those data, the rebalancing methodologies and how the index is calculated can be found in the index methodology [here](#).
