

# WisdomTree Renewable Energy UCITS ETF - USD Acc

## Sustainability-related disclosure

### Summary

#### **Betydande skada orsakas inte för målet för hållbara investeringar.**

Fonden följer WisdomTree Renewable Energy Index (indexet). Indexet har utformats för att säkerställa att de hållbara investeringar som ingår i indexet inte orsakar betydande skada genom att implementera miljörelaterade, sociala och bolagsstyrningsrelaterade (Environmental, Social and Governance, ESG) uteslutningskriterier och urvalskriterier som beaktar indikatorer för huvudsakliga negativa konsekvenser för hållbarhetsfaktorer (Principal Adverse Impact, PAI) baserat på tabell 1 i bilaga I till de tekniska standarder som kompletterar Förordning 2019/2088 (de tekniska standarderna). Indexet tillämpar uteslutningsscreening baserat på normer och värderingar, vilket beskrivs i indexmetoden.

#### **Fondens mål för hållbara investeringar**

Fonden har som mål för hållbar investering att investera i verksamheter inom värdekedjan för förnybar energi (renewable energy value-chain, REVC) som bidrar till miljömålet begränsning av klimatförändringarna. Förnybar energiproduktion utgör en viktig komponent vid dekarboniseringen av den globala ekonomin och begränsar därmed klimatförändringarna. Fonden uppnår detta mål genom att följa indexet.

#### **Investeringsstrategi**

Fondens investeringsmål är att följa indexets pris- och avkastningsutveckling, före avgifter och utgifter. För att uppnå sitt mål kommer fonden att använda en investeringsstrategi med "passiv förvaltning" och investera i ett representativt urval av de värdepapper som ingår i indexet, vilket utformats för att följa utvecklingen för företag som främst är involverade inom värdekedjan för förnybar energi. Indexet har valts ut som referensvärde för att stödja fondens mål för hållbara investeringar.

#### **Andel av investeringar**

Fonden kommer att investera alla, eller i stort sett alla, sina tillgångar i indexkomponenterna, vilket resulterar i att minst 90 procent av fondens nettoandelsvärde (NAV) kommer att bestå av hållbara investeringar.

## Övervakning av mål för hållbara investeringar

WisdomTree övervakar uppnåendet av fondens hållbara investeringsmål vid tiden för varje ombalansering av indexet.

### Metoder

Hur väl fonden uppnår sitt hållbara investeringsmål mäts av fonden med hjälp av data från indexleverantören samt tredjepartsleverantörer av data, där detta är relevant.

### Datakällor och databehandling

Fonden är en passivt förvaltd indexfond och uppnår sitt hållbara investeringsmål genom att följa indexet. WisdomTree behandlar data som tillhandahålls av tredjepartsleverantörer för screening av emittenter baserat på ESG-uteslutningskriterierna i syfte att skapa ett urval av investeringar som uppfyller kraven.

### Begränsningar för metoder och data

För att uppfylla fondens uttalade investeringsmål och placeringsinriktning förlitar sig WisdomTree på ESG-data från tredjepartsleverantörer, och datan kan vara ofullständig, felaktig eller otillgänglig. Det finns även en risk att indexleverantören eller någon annan dataleverantör (enligt vad som är tillämpligt) gör en felaktig utvärdering av ESG-poängen eller av ett företags involvering i vissa aktiviteter.

### Due diligence

WisdomTree utför due diligence med avseende på indexleverantören och jämförelseindexet innan fonden startas för att bedöma om fondens önskade investeringsresultat och hållbara investeringsmål kan uppnås.

### Strategier för engagemang

WisdomTree utövar sin rösträtt och engagerar sig på ett konstruktivt sätt i investeringsobjekten via sina investeringsförvaltare, till vilka viss portföljförvaltningsverksamhet har outsourcats. Vid valet och övervakningen av investeringsförvaltarna säkerställer WisdomTree att investeringsförvaltarnas policyer för röstning och engagemang uppfyller de standarder som WisdomTree definierat.

### Uppnåendet av målet för hållbara investeringar.

Indexet har valts ut som referensvärde för att uppfylla fondens mål för hållbara investeringar. Information om indexet finns [här](#).

## **No significant harm to the sustainable investment objective**

The Fund tracks the WisdomTree Renewable Energy Index (the Index). The Index is designed to ensure that sustainable investments included in the Index do not cause significant harm to other environmental or social objectives by implementing ESG exclusionary screening and selection criteria that takes account of PAI Indicators based on Table 1 of Annex I of the RTS. The Index applies norms and values-based exclusion screens as detailed in the Index methodology.

The ESG exclusionary criteria are aligned with certain mandatory PAI Indicators such as exposure to fossil fuels, controversial weapons, non-renewable energy consumption and production and violations of UN Global Compact Principles (UN GCPs) and OECD guidelines. Each PAI Indicator is individually assessed and compared, where relevant, against an absolute or relative threshold having regard to the individual PAI Indicator and underlying metric set out in SFDR Level 2 RTS. PAI Indicator performance is assessed quarterly at the Fund level based on a tailored PAI dataset received from the Investment Manager and third-party data provider. An investee company's performance, either overall or on certain PAI Indicators may be assessed possibly leading to engagement with the issuer and tracking performance after the engagement based on relevant PAI-related KPI and / or exclusion from the investable universe. In addition, the Index assesses greenhouse gas intensity and screens out the worst performing companies in the eligible investment universe as detailed in the Index methodology.

The Index methodology includes robust governance criteria whereby companies are assessed based on the Global Standards Screening (GSS) assessment which identifies and excludes from the eligible investment universe companies that violate or are at risk of violating international norms and standards, such as UNGCPs, UN Guiding Principles on Business and Human Rights (UN GPs) and OECD Guidelines for Multinational Enterprises and their underlying conventions. Companies on the UN, US and EU sanctions list are excluded. In addition to the governance screening, to be eligible for inclusion in the Index, a company must be listed on an eligible stock exchange listed in the Index methodology and must comply with securities listing rules including relevant corporate governance codes.

The DNSH assessment is also undertaken for the portion of the Fund's investments that are aligned with the EU Taxonomy. This assessment is carried out as part of the EU Taxonomy's technical screening criteria (TSC) process. Companies are considered not to significantly harm any of the other environmental objectives and considered EU Taxonomy aligned where they pass the TSC. The TSC is carried out by third-party data providers and is evaluated by WisdomTree for the portion of the Fund's investments aligned with the EU Taxonomy. Based on the DNSH assessment, the sustainable investments made by the Fund do not significantly harm any other environmental or social objective.

## **Sustainable investment objective of the financial product**

The Fund has a sustainable investment objective of investing in companies involved in the REVC which contributes to the environmental objective of climate change mitigation. Renewable energy production is a key component in decarbonising the global economy and limiting climate change. REVC business activities include technologies and solutions which aim to develop a renewable energy market, including wind, solar, hydrogen and other renewable technologies. Such business activities generate clean energy and have a positive effect on energy-related greenhouse gases.

The Fund achieves this objective by tracking the Index, which has a methodology that is aligned with attaining the sustainable investment objective of the Fund.

## **Investment strategy**

The investment objective of the Fund is to track the price and yield performance, before fees and expenses, of the Index. To achieve this objective, the Fund will employ a "passive management" (or indexing) investment approach and will invest in a representative sample of component securities of the Index which is designed to track the performance of companies primarily involved in the REVC. The Index has been designated as a reference benchmark for the purpose of supporting the sustainable investment objective of the Fund.

The Index applies ESG exclusionary criteria and seeks to exclude companies from the eligible investment universe that are significantly involved (as described in the Index methodology) in thermal coal, conventional and unconventional oil and gas exploration/production and in the tobacco industry, military contracting and small arms sectors. Companies with any involvement in controversial weapons or that fall within the bottom 5% based on their greenhouse gas intensity are also excluded from the eligible investment universe by the Index.

To be included in the Index, a security must be issued by a REVC company which is involved in one or more of the following REVC categories: raw materials, manufacturing, application, enablers or emerging technology, as defined in the Index methodology. The Index utilises an intensity rating which captures the perceived degree of a company's overall involvement in REVC (Intensity Rating). The weight of each security in the Index is calculated based on the Intensity Rating.

The Index methodology includes good governance criteria whereby companies are assessed based on the GSS assessment described above. The GSS assessment identifies and excludes companies from the eligible investment universe that violate or are at risk of violating certain commonly accepted international norms and standards, such as United Nations and OECD guidelines.

The Fund, through its Investment Manager, adopts an active ownership policy and believes in constructive engagement and exercising voting rights to promote stronger corporate governance and better management of ESG risks in investee companies.

## **Proportion of investments**

The Fund will invest all, or substantially all, of its assets in the constituents of the Index with the result that a minimum of 90% of the Fund's NAV will be aligned with the sustainable investment objective of the Fund.

A minimum of 25% of the Fund's sustainable investments are in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Up to 10% of the Fund's assets may be invested in ancillary liquid assets in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 or invested in assets for which there is insufficient ESG-related data. This applies in particular to assets for which ESG factors are insufficiently defined at present or which are not covered by third-party data providers.

For more information, please see the Supplement for the Fund.

## **Monitoring of environmental or social characteristics**

The Fund achieves the sustainable investment objective outlined above by tracking the Index. WisdomTree monitors the attainment of the Fund's sustainable investment objective at the time of each Index rebalance. This is carried out by evaluating whether the Index is correctly applying the stated ESG exclusionary and GSS assessment criteria outlined in detail above as well as determining the proportion of the Fund's investments active in the REVC in line with the Index methodology. This includes an evaluation by WisdomTree of ESG data, including sustainable investment and EU Taxonomy data which is provided by third-party data providers. As described more fully in the Index methodology, sustainable investment indicators used comprise of REVC intensity ratings which measure the perceived degree of involvement of a company across the REVC value chain and is derived from each company's REVC revenue exposure.

WisdomTree also monitors the tracking error of the Fund and reports this to investors as part of the publication of annual and interim financial statements of the ICAV. Information on the anticipated tracking error is also published in the Supplement for the Fund.

## **Methodologies**

The extent to which the sustainable investment objective of the Fund is attained is measured using data provided by the Index Provider and third-party data providers, where relevant.

The Index methodology is assessed by the Fund as being aligned with its sustainable investment objective of investing in companies being involved in the REVC. This assessment is carried out by the Fund at the time of each Index rebalance and is based on quantitative measures to evaluate the REVC categories described in the Index methodology. The relevant thresholds for evaluating the REVC categories are described in the Index methodology.

The Index excludes companies based on ESG exclusionary and GSS assessment criteria described above and in the Index methodology. The ESG exclusionary criteria are applied based on companies' revenue levels at the time of each Index rebalance using data provided by third-party data providers.

## **Data sources and processing**

The Fund is a passively managed index tracking fund and attains its sustainable investment objective by tracking the Index.

WisdomTree processes data provided by its ESG Data Provider to screen issuers based on the ESG exclusionary criteria as set out in the Index Methodology in order to establish the eligible investment universe.

Monitoring of the Index Provider and third-party data providers is carried out annually as part of WisdomTree's enhanced oversight and due diligence processes. This due diligence includes evaluating the methodologies adopted by our ESG Data Provider to assess issuers, the sources of information that they use and the quality of ESG data they provide. ESG Data coverage provided by third-party data providers is also assessed at the time of each Index rebalance. WisdomTree uses data sources from other third-parties for comparison purposes to identify any potential data inconsistencies. There may be issuers for which insufficient ESG-related data is available due to a lack of coverage by third-party data providers.

Data estimates may be used by third-party data providers particularly for smaller companies or where there are gaps in company reported data or where a company does not report actual revenues for certain business involvement categories.

### **Limitations to methodologies and data**

To meet the stated investment objective and policy of the Fund, WisdomTree relies on ESG data provided by third-party data providers and may be incomplete, inaccurate, or unavailable. As a result, there is a risk that the Index Provider or other data providers (as applicable) may incorrectly assess the ESG rating or the involvement of a company in certain activities as part of the ESG exclusionary criteria applied by the Index Provider. This may result in the incorrect inclusion or exclusion of a security from the Index and therefore the portfolio of the Fund.

Please refer to the section above "Data Sources and Processing" and "Due Diligence" regarding internal controls to monitor constituent data.

In placing reliance on external data providers, there may be inherent risk associated with errors in third-party data which may be detected by WisdomTree or the Index Provider. The result being that companies may from part of the investment universe that are inconsistent with the stated methodology of the Index and/or the stated investment objective/policy of the Fund. WisdomTree seeks to mitigate this risk by obtaining ESG data from reputable sources, using a second independent data source and investigating data differences to our primary ESG data provider.

Where an index constituent is identified as not meeting the stated sustainable investment objective of the Fund, it will be removed from the Index at the next scheduled rebalance (or periodic review). The Index may cease to meet the stated ESG criteria between index rebalances until the Index is rebalanced back in line with the Index methodology, at which point the Fund will also be rebalanced in line with the Index.

ESG Data Providers may have different business interests that could give rise to conflicts of interest when assigning ESG ratings or assessing the involvement of a company in certain activities.

### **Due diligence**

WisdomTree carries out due diligence on the Index Provider and reference Index prior to the launch of the Fund.

As part of this due diligence, WisdomTree assesses the Index methodology to determine whether it would achieve the desired investment outcome and the sustainable investment objective of the Fund. This evaluation includes the investment universe of the Index, coverage by third-party ESG data providers, ESG exclusionary criteria and security weighting methodology.

The evaluation also ensures that the Fund's sustainable investment objective does no significant harm to other environmental or social objectives. In addition, WisdomTree monitors PAIs indicators on sustainability factors of investee companies at the Fund level on a quarterly basis using an internally developed monitoring system and data received from the Investment Manager and the third-party ESG data provider.

## **Engagement policies**

As a responsible investor, WisdomTree adopts an active ownership approach to promote better corporate behaviour in investee companies in terms of sustainability and management of Environmental, Social and Governance risks.

WisdomTree exercises voting rights and constructively engages with investee companies through its investment managers, to whom portfolio management activities are outsourced. In selecting and monitoring investment managers, WisdomTree ensures that voting and engagement policies of the Investment Managers match the standards defined by WisdomTree.

Further details on WisdomTree's proxy voting policy are available at <https://www.wisdomtree.eu/en-gb/wisdomtree-investment-governance> and on WisdomTree voting dashboard available at: <https://www.wisdomtree.eu/en-ie/proxy-voting-dashboard>.

## **Attainment of the Sustainable Investment Objective**

The Index has been designated as a reference benchmark and is designed to track the performance of companies primarily involved in the REVC. REVC here refers to the technologies and solutions that aim to re-shape the power and energy market towards a renewable and sustainable basis, encompassing the value chains of wind, solar, hydrogen and other renewable technologies.

The Fund has determined that tracking the Index will enable it to meet its sustainable investment objective.

Information on how that Index is aligned with the sustainable investment objective of the Fund, including the input data, the methodologies used to select those data, the rebalancing methodologies and how the index is calculated can be found in the index methodology [here](#).
