## WisdomTree Strategic Metals UCITS ETF - USD Acc

ISIN: IE0007UE04X9

a share class of WisdomTree Strategic Metals UCITS ETF (the "Fund")

which is a sub-fund of WisdomTree Issuer ICAV. Managed by WisdomTree Management Limited.

### Objectives and Investment Policy

- The Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Energy Transition Metals Commodity UCITS Total Return Index (the "Index").
- The Index is designed to track the performance of a diversified basket of metal commodities that are associated with energy transition themes, including (but not limited to) electric vehicles, transmission, charging, energy storage, solar, wind, and hydrogen production.
- The Index was developed by WisdomTree, Inc. ("WTI"), in collaboration with third-party specialists involved in the energy transition industry.
- The selection and weighting of component commodities in the Index (each a "Relevant Commodity", together the "Relevant Commodities") are based on an intensity rating ("Intensity Rating"). The Intensity Rating measures the exposure and growth metrics for each Relevant Commodity within the usage of energy transition technologies, as well as each Relevant Commodity's market balance.
- The maximum weight of each Relevant Commodity in the Index is capped at 20% at the Index rebalance. The Index is reconstituted on a semi-annual basis.
- The Fund may have an indirect exposure to an Index constituent of up to 20% of its net asset value. This limit may be raised to 35% for a single Index constituent when exceptional market conditions apply (such as the dominance of a particular Index constituent).
- The Fund will gain indirect exposure to the Index constituents through the use of swaps. By entering into swap agreements with one or more banks, the Fund receives payments from the bank when the Index goes up and makes payments to the bank when the Index goes down. By using swaps, the Fund can efficiently track the upward or downward performance of the Index. The Fund pays certain fees and expenses to the bank(s) for entering into the swaps. The use of swaps results in the management of cash and collateral by the Fund's investment manager.
- In order to achieve its objective, the Fund will employ a "passive management" (or indexing) investment approach and will invest in a portfolio of instruments that so far as possible and practicable replicate the performance of the Index.
- The Fund may enter into repurchase/reverse repurchase agreements and stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the prospectus for WisdomTree Issuer ICAV (the "Prospectus").
- Shares of the Fund ("Shares") are listed on one or more stock exchanges. Typically, only Authorised Participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.
- Distribution policy: Dividends will not be distributed to shareholders in respect of the shares of this class. Income and other profits will be accumulated and reinvested on behalf of the shareholders.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Currency: The base currency of the Fund is US Dollar. The currency of denomination of this share class is US Dollar.
- For full investment objectives and policy details, please refer to the supplement to the Prospectus for the Fund (the "Supplement").

### Risk and Reward Profile

**Lower Risk**  
Potentially lower rewards

**Higher Risk**  
Potentially higher rewards

- The categorisation above is not guaranteed to remain unchanged and may shift over time.
- The lowest category (1) does not imply a risk-free investment.
- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The SRRI categorisation above (6) is due to the nature of the Fund's investments and risk associated with those investments, including:
  - Commodity Risks: Commodity prices are more volatile than other asset categories, making investments in commodities riskier and more complex than other investments.
  - The performance of a commodity and the corresponding commodity contract is dependent upon various factors, including supply and demand, liquidity, weather conditions and natural disasters, direct investment costs, location, changes in tax rates, and roll return risk.
  - There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
  - Investment risk may be concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
  - FDI Risks: include (i) failure to predict accurately the direction of market movements and (ii) market risks of lack of liquidity or lack of correlation between the change in the value of the underlying asset and the value of the Fund's derivatives.

- Risks not covered by the indicator, but which are materially relevant to the Fund include:
  - Tracking error risk: The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.
  - There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
  - It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions.
  - Counterparty risk: The Fund is subject to the risk that third parties with which the Fund may transact and who may provide services such as the safekeeping of assets may go bankrupt or fail to pay money due to the Fund or return property belonging to the Fund.
  - Operational risk: There is a risk of default or error within the different service providers involved in managing and servicing the Fund, and valuing the portfolio.
- For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

## One-off charges taken before or after you invest

|              |       |
|--------------|-------|
| Entry charge | None* |
| Exit charge  | None* |

## Charges taken from the Fund over a year
