WisdomTree Global Quality Growth UCITS ETF - USD Acc (the "Fund")

ISIN: IE000Y83YZ44

A sub-fund of WisdomTree Issuer ICAV. Managed by WisdomTree Management Limited.

Objectives and Investment Policy

- The Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Global Quality Growth UCITS Index (the "Index").
- The index aims to deliver an exposure to high quality, growing companies from the developed markets which meet WisdomTree's ESG (environmental, social and governance) criteria.
- The Index is rule based and is comprised of 200 mid and large-cap companies with quality and growth characteristics. To be included in the Index, companies must conduct their primary business activities in the US, Europe, or other developed markets listed in the Index methodology, and meet minimum market capitalization and liquidity requirements.
- The top 100 companies from the US, top 60 companies from Europe, and top 40 companies from other developed markets are selected based on their quality and growth factor rankings.
- The component companies are weighted by free-float market capitalisation, following the caps and criteria outlined in the Index methodology.
- The Index is "reconstituted" on a semi-annual basis.
- In order to achieve its objective, the Fund will employ a "passive management" (or indexing) investment approach and will invest in a portfolio of equity securities that so far as possible and practicable consists of the component securities of the Index. The Fund intends to replicate the constituents of the Index by holding all of the securities comprising the Index in a similar proportion to their weightings in the Index. In order to replicate the Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer when exceptional market conditions apply (such as the dominance of a particular Index constituent).
- The Fund may from time to time invest in equity or equity-related securities listed or traded on a Regulated Market (such as large, medium or small cap equities, common or preferred stocks and Depositary Receipts) and open-ended collective investment undertakings.
- The Fund may enter into repurchase/reverse repurchase agreements and stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the prospectus for WisdomTree Issuer ICAV (the "Prospectus").
- Shares of the Fund ("Shares") are listed on one or more stock exchanges. Typically, only Authorised Participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.
- Distribution policy: Dividends will not be distributed to shareholders in respect of the Shares of this class. Income and other profits will be accumulated and reinvested on behalf of the shareholders.
- Currency: The base currency of the Fund is US Dollar.
- For full investment objectives and policy details, please refer to the supplement to the prospectus for the Fund (the "Supplement").

Risk and Reward Profile

- The categorisation above is not guaranteed to remain unchanged and may shift over time.
- The lowest category (1) does not imply a risk-free investment.
- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The SRRI categorisation above (6) is due to the nature of the Fund's investments and risk associated with those investments, including:
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
 - Investment risk may be concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- Currency Risk: The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund.
- Risks not covered by the indicator, but which are materially relevant to the Fund include:
 - Tracking error risk: The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.
 - There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
 - It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions.
 - Counterparty Risk: The Fund is subject to the risk that third parties with which the Fund may transact may go bankrupt or fail to pay money due to the Fund or return property belonging to the Fund.
- For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.
