

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

WisdomTree Enhanced Commodity UCITS ETF - EUR Hedged Acc

ISIN: IE00BG88WG77

a share class of WisdomTree Enhanced Commodity UCITS ETF (the "Fund")

which is a sub-fund of WisdomTree Issuer ICAV. Managed by WisdomTree Management Limited.

Objectives and Investment Policy

- The Fund seeks to track the price and yield performance, before fees and expenses of the WisdomTree Enhanced Commodity Total Return Index (the "Index").
- The Index is a US Dollar denominated index whose main objective is to provide a broad and diversified UCITS compliant commodity exposure, tracking the performance of a basket of commodities indices covering energy, agriculture, industrial metals and precious metals. The Index is rebalanced on a daily basis. The Index generates exposure to each commodity through investment in the relevant Bloomberg® Roll Select Indices, other than gold and silver where the exposure is achieved via the relevant Bloomberg® Gold and Silver indices as well as "seasonal commodities" where the exposure is achieved via the relevant Bloomberg Seasonal Roll indices (each an "Index Component"). The base weightings for each commodity are determined by the Bloomberg® Commodity Index ("BCOM"). On a daily basis, the Index applies a systematic factor-based weighting overlay to overweight or underweight each commodity (excluding gold and silver) within defined caps and floors, based on three key factors: roll yield (backwardation), slope momentum, and price momentum.
- The Fund may have an indirect exposure to an Index Component of up to 20% of its Net Asset Value. This limit may be raised to 35% for a single issuer when exceptional market conditions apply (such as the dominance of a particular Index Component).
- The Fund will gain indirect exposure to the Index Components through the use of swaps. By entering into swap agreements with one or more banks whereby the Fund receives payments from the bank when the Index goes up and the Fund makes payments to the bank when the Index goes down. By using swaps, the Fund can efficiently track the upward or downward performance of the Index. The Fund pays certain fees and expenses to the bank(s) for entering into the swaps. The use of swaps results in the management of cash and collateral by the Fund's investment manager.
- The Fund may enter into repurchase/reverse repurchase agreements and stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the prospectus for WisdomTree Issuer ICAV (the "Prospectus").
- Shares of the Fund ("Shares") are listed on one or more stock exchanges. Typically, only Authorised Participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.
- Distribution policy: Dividends will not be distributed to shareholders in respect of the shares of this class. Income and other profits will be accumulated and reinvested on behalf of the shareholders.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Currency: The base currency of the Fund is US Dollar. The currency of denomination of this share class is Euro.
- For full investment objectives and policy details, please refer to the supplement to the Prospectus for the Fund (the "Supplement").

Risk and Reward Profile

Lower Risk
Potentially lower rewards

Higher Risk
Potentially higher rewards

- The categorisation above is not guaranteed to remain unchanged and may shift over time.
- The lowest category (1) does not imply a risk-free investment.
- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The SRRI categorisation above (5) is due to the nature of the Fund's investments and risk associated with those investments, including:
 - Commodity prices are typically more volatile than many other asset classes, making commodity investments riskier and more complex.
 - The performance of a commodity contract depends on multiple factors (e.g. supply/demand, location, weather, direct investment costs, roll return risk).
 - No assurance that any value appreciation will occur, nor that the Fund's objective is met.
 - Concentration risk: The Fund may be more sensitive to localised events affecting sectors/currencies/regions in which it invests.
 - FDI Risks: includes inaccurate market predictions, lack of liquidity, or a lack of perfect correlation between the underlying asset and the derivative value.

Risks not covered by the indicator, but which are materially relevant to the Fund include:

- Tracking error risk: The Fund's performance may not exactly track the Index, potentially due to market fluctuations, transaction costs, changes in the Index composition, or other Fund expenses.
 - There is no guarantee that Shares can always be bought or sold on an exchange or that the market price will reflect the Fund's NAV.
 - It may be difficult for the Fund to buy or sell certain investments under certain market conditions, resulting in unfavorable execution prices compared to normal circumstances.
 - Counterparty risk: The Fund is subject to the risk that third parties with which the Fund may transact and who may provide services such as the safekeeping of assets may go bankrupt or fail to pay money due to the Fund or return property belonging to the Fund.
 - Operational risk: There is a risk of default or error within the different service providers involved in managing and servicing the Fund, and valuing the portfolio.
 - Hedging risk: The share class's hedging strategy aims to minimize currency fluctuation impacts. However, forward currency contracts may not perfectly offset actual fluctuations between the underlying portfolio currencies and the hedged share class currency.
- For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None*
Exit charge	None*

Charges taken from the Fund over a year

Ongoing charges	0.35%**
-----------------	---------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

* These are the maximum fees and charges which are currently payable by authorised participants dealing directly with WisdomTree Issuer ICAV. The Fund has the right to charge authorised participants an entry charge up to a maximum of 3% and an exit charge up to a maximum of 3%. The Fund is currently not exercising its entitlement to apply entry and exit charges.

*Entry and exit charges are not applicable to secondary market investors. As the Fund is an ETF, secondary market investors will not typically be able to deal directly with WisdomTree Issuer ICAV. Investors buying Shares on exchange will do so at market prices which will reflect broker fees and/or other charges.

* Authorised participants dealing directly with the Fund will pay related transaction costs.

* For authorised participants dealing directly with the Fund, switching between sub-funds may incur a maximum switching charge of 3%. The Fund is currently not exercising its entitlement to apply switching charges.

** The ongoing charges may vary year on year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another investment fund.

Please see "Fees and Expenses" section of the Prospectus and "Fees" and "Share Dealing" ("Subscriptions following the initial offer period" and "Redemptions" sub-sections) sections of the Supplement for further information about charges.

Past Performance

Historical Performance

- Historical performance is not an indication of future performance and any investments may go down in value.
- The chart shows the share class' annual performance as of 31/12/2025 calculated in Euro
- The Fund was launched in 2016
- Share class launch date: 14/08/2018
- Performance is shown after deduction of the ongoing charges. It excludes entry and exit fees.
- *Index Name: WisdomTree Enhanced Commodity Total Return Index
- Before 18 September 2025, the benchmark for the Fund was the Optimised Roll Commodity Total Return Index. Index performance data reflects this benchmark for all periods before that date and reflects the WisdomTree Enhanced Commodity Total Return Index from 18 September 2025 onward.
